

Meta Henrico Data Center

The Henrico Data Center is part of our global infrastructure that brings Meta technologies and programs to life, making the future of human connection possible.

\$1B+

Data center investment in Virginia

2017

Broke ground on the Henrico Data Center

200+

Operational jobs supported

1,500

Skilled trade workers on site at peak construction

\$4.2M+

Direct funding to Henrico County-area schools and nonprofits

200+

Grants and sponsorships provided locally since 2019

Operating Responsibly

Responsible energy and water use

Meta worked with Dominion Energy to plan for our energy needs and to ensure we are paying the full costs for the energy used by our data center, so consumers are not negatively impacted. Meta has also worked with Henrico County to pay the full cost of water and wastewater service for our data center. Our operational data center buildings achieve LEED® Gold certification by focusing on efficiency, sustainability and innovation.

Water stewardship

Our goal is to be water positive in 2030, where we will restore more water than we consume globally where Meta has owned operations.

Clean and renewable energy

We are committed to supporting the addition of new energy projects to the grid — this includes eight projects in Virginia that are adding 700 megawatts of new clean and renewable energy. Meta matches all of its electricity use with 100% clean and renewable energy.

Our global fleet of data centers supports Meta technologies that empower more than 3.6 billion people around the world to share ideas, offer support and make a difference.

Partnering with Virginia

Meta is committed to being a good neighbor and community partner. We do this by working with city and local partners to fund new critical infrastructure, such as roads, energy, water, wastewater and conservation projects, in addition to providing grants annually to support schools and nonprofits.

Supporting local organizations

Meta supports the community through The Future is for Everyone Fund, providing direct funding for local nonprofits that support the community. Additionally, we bring our no-cost digital skills training workshops to Henrico, helping small businesses and nonprofits grow their reach.

Meta is proud to partner with the Science Museum of Virginia Foundation on a STEAM education and environmental sustainability initiative that will fund the installation of a working greenhouse and the greening of the museum's 37-acre campus. This program will expand hands-on learning opportunities for students, provide Earth Day programming for the community and offer STEM camps for underserved youth in Henrico's East End. Through this investment, Meta is helping to inspire the next generation of scientists and environmental stewards, demonstrating a commitment to Henrico's long-term vitality.

Community spotlight: Bridging the digital divide

Since 2019, the Henrico Data Center has supported organizations and projects that meet community needs. Meta invested in PCs for People to bring their digital equity operations to the Richmond and Hampton Roads markets. Through electronic reuse, low-cost internet and free digital skills training, PCs for People provides individuals and families with low incomes the life-changing access to computers and connectivity. Meta's investment is helping to connect thousands of underserved families across Virginia to the technology and skills they need to thrive.

Water Stewardship

Our water stewardship program is focused on increasing data center water efficiency, supporting water restoration and conservation projects in watersheds where we have data centers, and being transparent with our water data.

The Henrico Data Center prioritizes on-site water efficiency by:

- Using cooling technology that is significantly more water efficient than the industry standard.
- Reusing water numerous times before discharging it as wastewater.
- Landscaping with native vegetation where possible to reduce irrigation demands.
- Capturing and infiltrating rainwater on site.
- Using water-saving fixtures and technologies within data center facilities.

Workforce Development

We are driving America's Workforce Academy (AWA), a nationwide, cost-free, fast-track program to long-term career in a skilled trade powered by an initial \$115 million investment. Graduates earn both industry-recognized National Center for Construction Education and Research (NCCER) credentials and an America's Workforce Certificate, as well as a guaranteed job.

We're proud to support community projects led by:
