

# Meta's Huntsville Data Center

The Huntsville Data Center is part of Meta's global infrastructure that brings our technologies and services to life.

## \$1.5B+

Data center investment in Alabama

## 2018

Broke ground on the Huntsville Data Center

## 300+

Operational jobs supported once completed

## 1,200

Skilled trade workers on site at peak construction

## \$3.9M+

Direct funding to Madison County area schools and nonprofits

## 80+

Grants and sponsorships provided locally since 2019

## We prioritize sustainability

Meta's goal is to be water positive in 2030, where we restore more water than we consume.

Our data centers' electricity use is matched with 100% renewable energy and our global operations have reached net zero emissions.

Meta's supported projects are adding 227MW of new renewable energy in Alabama.

Meta's global fleet of data centers support our technologies that empower more than 3 billion people around the world to share ideas, offer support and make a difference.

Meta

# Partnering with Alabama

Alabama is home to two of Meta's data centers. We are supporting the community through sourcing labor and materials locally where we can, volunteering, partnering with local chambers, and supporting local schools, nonprofits and community projects.

## Supporting local schools and nonprofits

One way we support the community is through our annual Data Center Community Action Grants program and other direct funding for projects that put the power of technology to use for community benefit, give people the power to build strong, sustainable communities, and improve STEAM education.

## Prioritizing sustainability

Meta approaches sustainability from the ground up — from design and construction to operations — by prioritizing energy efficiency and renewable energy, water stewardship, and responsibly managing the end of life of our equipment. Our operational data center buildings achieve LEED® Gold certification by focusing on efficiency, sustainability and innovation. In Alabama, we worked with Tennessee Valley Authority to meet our 100% renewable energy goals for the Huntsville Data Center.

## Minimizing water use

We are proud to build some of the most sustainable data centers in the world and prioritize onsite water efficiency. The Huntsville Data Center:

- Uses cooling technology that is significantly more efficient than the industry standard.
- Reuses water numerous times before discharging it as wastewater.
- Is landscaped with native vegetation where possible to reduce irrigation demands.
- Captures and infiltrates rainwater on site
- Incorporates water saving fixtures and technologies within data center facilities.

## We're proud to support projects led by:

- 100 Black Men of Greater Huntsville
- Alabama School of Cyber Technology & Engineering
- AUM Foundation
- Black Data Processing Association
- Boys & Girls Club of North Alabama
- Community Foundation of Greater Huntsville
- Drake State Community & Technical College
- Fantasy Playhouse Children's Theater
- Girls Inc. of Huntsville
- Huntsville City Schools
- Huntsville Schools Foundation
- Huntsville Space & Rocket Center
- Madison City Schools
- Madison County Schools
- Neighborhood Concepts
- Northwood Community Outreach
- Raise Your Hand - The Schools Foundation
- Real Fathers Making a Difference
- The Cap & Gown Project
- The Livin' Room
- Village of Promise
