

# Meta Huntsville Data Center

The Huntsville Data Center — our first in Alabama — is part of our global infrastructure that brings Meta technologies and programs to life, making the future of human connection possible.

## \$1.5B+

Data center investment in Huntsville, Alabama

## 2018

Broke ground on the Huntsville Data Center

## 300+

Operational jobs supported once completed

## 1,200

Skilled trade workers on site at peak construction

## \$4.5M+

Direct funding to Madison County-area schools and nonprofits

## 80+

Grants and sponsorships provided locally since 2019

## Operating Responsibly

### Responsible energy and water use

Meta worked with Tennessee Valley Authority to plan for our energy needs and to ensure we are paying the full costs for the energy used by our data center, so consumers are not negatively impacted. Meta has also worked with Huntsville Utilities to pay the full cost of water and wastewater service for our data center. Our operational data center buildings achieve LEED® Gold certification by focusing on efficiency, sustainability and innovation.

### Water stewardship

Our goal is to be water positive in 2030, where we will restore more water than we consume globally where Meta has owned operations.

### Clean and renewable energy

We are committed to supporting the addition of new energy projects to the grid — this includes three projects in Alabama that are adding 487 megawatts of new clean and renewable energy. Meta matches all of its electricity use with 100% clean and renewable energy.

Our global fleet of data centers supports Meta technologies that empower more than 3.6 billion people around the world to share ideas, offer support and make a difference.

# Partnering with Alabama

Meta is committed to being a good neighbor and community partner. We do this by working with city and local partners to fund new critical infrastructure, such as roads, energy, water, wastewater and conservation projects, in addition to providing grants annually to support schools and nonprofits.

## Supporting local organizations

Meta supports the community through The Future is for Everyone Fund, providing direct funding for local nonprofits that support the community. Additionally, we bring our no-cost digital skills training workshops to Huntsville, helping small businesses and nonprofits grow their reach. The Huntsville Data Center proudly supports all three public school systems in Madison County.

Meta has been proud to invest in the Huntsville community. Meta provided the largest-ever donation to Free 2 Teach, a Huntsville-based charity that provides free school supplies to public school teachers in all three public school districts in Madison County.

## Water Stewardship

Our water stewardship program is focused on increasing data center water efficiency, supporting water restoration and conservation projects in watersheds where we have data centers, and being transparent with our water data.

The Huntsville Data Center prioritizes on-site water efficiency by:

- Using cooling technology that is significantly more water efficient than the industry standard.
- Reusing water numerous times before discharging it as wastewater.
- Landscaping with native vegetation where possible to reduce irrigation demands.
- Capturing and infiltrating rainwater on site.
- Incorporating water-saving fixtures and technologies within data center facilities.

## Workforce Development

Meta is investing in the workforce that's building America's digital infrastructure — starting with the communities where we live and work. That commitment includes America's Workforce Academy (AWA), a nationwide, unprecedented fast-track to a long-term career in a skilled trade. Powered by an initial \$115 million first-year investment, AWA is a cost-free program that supports all participants while they learn and then guarantees a job for all graduates. Graduates earn both the industry-recognized National Center for Construction Education and Research (NCCER) credential and an America's Workforce Certificate, both designed to travel with the worker across employers and industry sectors.

## We're proud to support community projects led by:

Alabama School of Cyber
