

Meta's Mesa Data Center

The Mesa Data Center is part of Meta's global infrastructure that brings our technologies and services to life.

\$1B+

Data center investment in Arizona

2021

Broke ground on the Mesa Data Center

200+

Operational jobs supported once completed

2,000

Skilled trade workers on site at peak construction

\$1.3M+

Direct funding to Maricopa County-area schools and nonprofits

40+

Grants and sponsorships provided locally since 2021

We prioritize sustainability

Meta's goal is to be water positive in 2030, where we restore more water than we consume.

Our data centers' electricity use is matched with 100% clean and renewable energy, and our global operations have reached net zero emissions.

Meta-supported projects are adding 450 megawatts of new renewable energy in Arizona.

Meta's global fleet of data centers supports our technologies that empower more than 3 billion people around the world to share ideas, offer support and make a difference.

Meta

Partnering with Arizona

We are supporting the community through sourcing labor and materials locally where we can, volunteering, partnering with local chambers, and supporting local schools, nonprofits and community projects.

Supporting local schools and nonprofits

We support the community through our annual Data Center Community Action Grants program and other direct funding for projects that put the power of technology to use for community benefit, give people the power to build strong, sustainable communities, and improve STEAM education. We've provided more than \$1.3 million in grants to local schools and nonprofits since 2021.

Prioritizing sustainability

Meta approaches sustainability from the ground up — from design and construction to operations — by prioritizing energy efficiency and renewable energy, water stewardship, and responsibly managing the end of life of our equipment. Our operational data center buildings achieve LEED® Gold certification by focusing on efficiency, sustainability and innovation. We are working with the Salt River Project to meet our 100% clean and renewable energy goal for the Mesa Data Center. This includes supporting three renewable energy projects in Arizona.

Minimizing water use

We are proud to build some of the most sustainable data centers in the world and prioritize on-site water efficiency. The Mesa Data Center will:

- Use cooling technology that is significantly more water efficient than the industry standard.
- Be landscaped with native vegetation where possible to reduce irrigation demands.
- Capture and infiltrate rainwater on site.
- Incorporate water-saving fixtures and technologies within data center facilities.

Restoring more water than we consume

Meta is committed to restoring more water than we consume into the Colorado River and Salt River basins by supporting projects led by partners, including:

- BlueCommons Inc.
- City of Phoenix
- Colorado River Indian Tribes (CRIT) System Conservation Project, Drip Irrigation, N-Drip and Agricultural Efficiency projects
- Dig Deep
- The Mason Lane Water Users Association
- Salt River Project

We're proud to support community projects led by:

- Arizona State University MIX Center
- Arizona Sustainability Alliance
- Audubon Southwest
- Azura Literacy
- Boys & Girls Clubs of the Valley
- Gilbert Public Schools
- i.d.e.a. Museum
- Junior Achievement of Arizona
- Maggie's Place
- Mesa Community College
- Mesa Historical Museum
- Mesa Public Schools
- Mesa West Rotary Club
- A New Leaf
- Queen Creek Unified School District
