

# Meta's New Albany Data Center

The New Albany Data Center is part of Meta's global infrastructure that brings our technologies and services to life.

**\$1.5B+**

Data center investment in Ohio

**2017**

Broke ground on the New Albany Data Center

**300+**

Operational jobs supported once completed

**1,200**

Skilled trade workers on site at peak construction

**\$5.6M+**

Direct funding to Franklin and Licking County-area schools and nonprofits

**100+**

Grants and sponsorships provided locally since 2019

## We prioritize sustainability

Meta's goal is to be water positive in 2030, where we restore more water than we consume.

Our data centers' electricity use is matched with 100% clean and renewable energy, and our global operations have reached net zero emissions.

Meta-supported projects are adding 257 megawatts of new renewable energy in Ohio.

Meta's global fleet of data centers supports our technologies that empower more than 3 billion people around the world to share ideas, offer support and make a difference.

# Partnering with Ohio

We are committed to supporting the community through sourcing labor and materials locally where we can, volunteering, partnering with local chambers, and supporting local schools, nonprofits and community projects.

## Supporting local schools and nonprofits

We support the community through our annual Data Center Community Action Grants program and other direct funding for projects that put the power of technology to use for community benefit, give people the power to build strong, sustainable communities, and improve STEAM education.

## Prioritizing sustainability

Meta approaches sustainability from the ground up — from design and construction to operations — by prioritizing energy efficiency and renewable energy, water stewardship, and responsibly managing the end of life of our equipment. Our operational data center buildings achieve LEED® Gold certification by focusing on efficiency, sustainability and innovation. We worked with multiple partners to meet our 100% clean and renewable energy goal for the New Albany Data Center. This includes supporting two new renewable energy projects in Ohio.

## Minimizing water use

We are proud to build some of the most sustainable data centers in the world and prioritize on-site water efficiency. The New Albany Data Center:

- Uses cooling technology that is significantly more water efficient than the industry standard.
- Reuses water numerous times before discharging it as wastewater.
- Is landscaped with native vegetation where possible to reduce irrigation demands.
- Captures and infiltrates rainwater on site.
- Utilizes water-saving fixtures and technologies within data center facilities.

## We're proud to support community projects led by:

Big Brothers Big Sisters of Central Ohio

Boys & Girls Clubs of Central Ohio

C-TEC (Career and Technical Education Centers) of Licking County

Columbus City Schools

COSI (Center of Science and Industry)

Girl Scouts of Ohio's Heartland

Healthy New Albany

Johnstown-Monroe School District

Junior Achievement of Central Ohio

Licking County Chamber of Commerce

Licking Heights Local Schools

New Albany Chamber of Commerce

New Albany Community Foundation

New Albany-Plain Local Schools

OhioX

Pataskala Public Library

Southwest Licking School Districts

Together We Grow

Westerville Education Foundation

The Works: Ohio Center for History, Art & Technology
