

# Meta's New Albany Data Center

The New Albany Data Center is part of Meta's global infrastructure that brings our technologies and services to life.

**\$1.5B+**

Data center investment in Ohio

**2017**

Broke ground on the New Albany Data Center

**300+**

Operational jobs supported once completed

**1,200**

Skilled trade workers on site at peak construction

**\$5M+**

Direct funding to Franklin and Licking County area schools and nonprofits

**90+**

Grants and sponsorships provided locally since 2019

## We prioritize sustainability

Meta will be water positive in 2030, where we restore more water than we consume.

Meta-supported projects are adding 257MW of new renewable energy in Ohio.

Our global operations, including our data centers and offices, are supported by 100% renewable energy and have reached net zero emissions.

Meta's global fleet of data centers support our technologies that empower more than 3 billion people around the world to share ideas, offer support and make a difference.

# Partnering with Ohio

We are committed to supporting the community through hiring people to build and operate our data center, volunteering and supporting local schools, nonprofits and community projects.

## Supporting local schools and nonprofits

One way we support the community is through our annual Data Center Community Action Grants program and other direct funding for projects that put the power of technology to use for community benefit, connect people online or off and improve STEM education.

## New renewable energy investments

Meta worked with multiple partners to meet our 100% renewable energy goals for the New Albany Data Center. This includes supporting two new renewable energy projects in Ohio.

## Minimizing water use

We are proud to build some of the most sustainable data centers in the world and prioritize onsite water efficiency. The New Albany Data Center:

- Uses cooling technology that is significantly more efficient than the industry standard.
- Reuses water numerous times before discharging it as wastewater.
- Is landscaped with native vegetation where possible to reduce irrigation demands.
- Captures and infiltrates rainwater on site.
- Utilizes water saving fixtures and technologies within data center facilities.

## We're proud to support projects led by:

Alexandria Public Library  
Big Brothers Big Sisters of Central Ohio  
COSI (Center of Science and Innovation)  
Form5 Prosthetics  
Girls Scout of Ohio's Heartland  
Her Academy  
Johnstown-Monroe Local County Schools  
Junior Achievement of Central Ohio  
Licking County Chamber of Commerce  
Licking Heights Local Schools
