

# Meta's Temple Data Center

The Temple Data Center will be part of Meta's global infrastructure that brings our technologies and services to life.

## \$800M+

Data center investment in Texas

## 2022

Broke ground on the Temple Data Center

## ~100

Operational jobs supported once completed

## 1,200

Skilled trade workers on site at peak construction

## \$460K+

Direct funding to Bell County-area schools and nonprofits

## 1,919MW

New renewable energy that Meta-supported projects are adding in Texas to match our data center electricity use with 100% renewable energy

## We prioritize sustainability

Meta's goal is to be water positive in 2030, where we restore more water than we consume.

Our data centers' electricity use is matched with 100% clean and renewable energy, and our global operations have reached net zero emissions.

Meta-supported projects are adding 1,919 megawatts of new renewable energy in Texas.

Meta's global fleet of data centers supports our technologies that empower more than 3 billion people around the world to share ideas, offer support and make a difference.

# Partnering with Texas

Texas is home to two of Meta's data centers. We are committed to supporting the community through sourcing labor and materials locally where we can, volunteering, partnering with local chambers, and supporting local schools, nonprofits and community projects.

## Supporting local schools and nonprofits

We launched our annual Data Center Community Action Grants program in fall 2024 to support projects that put the power of technology to use for community benefit, give people the power to build strong, sustainable communities, and improve STEAM education.

## Prioritizing sustainability

Meta approaches sustainability from the ground up — from design and construction to operations — by prioritizing energy efficiency and renewable energy, water stewardship, and responsibly managing the end of life of our equipment. Our operational data center buildings achieve LEED® Gold certification by focusing on efficiency, sustainability and innovation. We are working with multiple partners to meet our 100% clean and renewable energy goal for our operations in Texas, including the Temple Data Center. This includes supporting nine new renewable energy projects in Texas.

## Minimizing water use

We are proud to build some of the most sustainable data centers in the world and prioritize on-site water efficiency. The Temple Data Center will:

- Use cooling technology that is significantly more water efficient than the industry standard.
- Be landscaped with native vegetation where possible to reduce irrigation demands.
- Capture and infiltrate rainwater on site.
- Incorporate water-saving fixtures and technologies within data center facilities.

## We're proud to support community projects led by:

- Bell County Museum
- Bell County 4-H
- Belton Independent School District
- Innovation Black Chamber of Commerce
- Temple Chamber of Commerce
- Temple Children's Museum
- Temple College
- Temple Economic Development Corporation
- Temple Education Foundation
- Temple Independent School District
