Meta’s global fleet of data centers support our technologies that empower more than 3 billion people around the world to share ideas, offer support and make a difference.

Meta’s Sarpy Data Center

The Sarpy Data Center is part of Meta’s global infrastructure that brings our technologies and services to life, along with future immersive experiences like the metaverse — the next chapter of the internet.

- **$1.5B+**
  - Data center investment in Nebraska

- **2017**
  - Broke ground on the Sarpy Data Center

- **300+**
  - Operational jobs supported once completed

- **1,300**
  - Skilled trade workers on site at peak construction

- **$2.7M+**
  - Direct funding to Sarpy County area schools and nonprofits

- **71**
  - Grants awarded since 2020 through the Data Center Community Action Grants program and other funding

We prioritize sustainability

- Meta will be water positive by 2030, where we restore more water than we consume.
- Meta has added 318MW of new renewable energy in Nebraska.
- Our global operations, including our data centers and offices, are supported by 100% renewable energy and have reached net zero emissions.

Partnering with Nebraska

We are committed to supporting the community through hiring people to build and operate our data center, volunteering and supporting local schools, nonprofits and community projects.

Supporting local schools and nonprofits

One way we support the community is through our annual Data Center Community Action Grants program and other direct funding for projects that put the power of technology to use for community benefit, connect people online or off and improve STEM education.

New renewable energy investments

Meta worked with Omaha Public Power District to meet our energy goals for the Sarpy Data Center. This includes creating a new service option called rate schedule 261M that enabled us to support the Sarpy Data Center with 100% renewable energy. Meta also supports a new renewable energy project in Nebraska.

Minimizing water use

We are proud to build some of the most sustainable data centers in the world and prioritize onsite water efficiency. The Sarpy Data Center:

- Uses cooling technology that is significantly more efficient than the industry standard.
- Reuses water numerous times before discharging it as wastewater.
- Is landscaped with native and drought resistant vegetation and many use captured rainwater for irrigation.
- Captures and infiltrates rainwater on site.
- Incorporates water saving fixtures and technologies within data center facilities.

We’re proud to support projects led by:

- Arbor Day Foundation
- Bellevue Public Schools
- Fontenelle Forest
- Gifford Farm Education Center
- Girl Scouts Spirit of Nebraska
- Gretna Public Schools
- La Vista Community Foundation
- Lift Up Sarpy
- Logan Fontenelle Middle School
- Midlands African Chamber
- Midlands Community Foundation
- Midlands Community Foundation Coronavirus Response Fund
- Nebraska Vietnam Veterans Memorial
- Nebraskans for Solar
- Omaha STEM Ecosystem
- Papillion Area Historical Society
- Papillion Community Foundation
- Papillion La Vista Community Schools
- Papillion La Vista Community Theatre
- Papillion Public Library
- Prairie STEM
- Sarpy Community YMCA
- Sarpy County Food Pantries (via Papillion Community Foundation)
- Sarpy County Historical Society
- Springfield Community Foundation
- Springfield Memorial Library
- Springfield Platteview Community Schools
- Twin Ridge Elementary
- United Way of the Midlands
- YMCA of Greater Omaha
