Meta’s Prineville Data Center

The Prineville Data Center is part of Meta’s global infrastructure that brings our technologies and services to life, along with future immersive experiences like the metaverse — the next chapter of the internet.

$2B+
Data center investment in Oregon

2010
Broke ground on the Prineville Data Center

350+
Operational jobs supported

1,000
Skilled trade workers on site at peak construction

$3.8M+
Direct funding to Crook County area schools and nonprofits

266
Grants awarded since 2011 through the Data Center Community Action Grants program and other funding

We prioritize sustainability

Meta will be water positive by 2030, where we restore more water than we consume.

Meta is adding 676MW of new renewable energy to PacifiCorp’s grid.

Our global operations, including our data centers and offices, are supported by 100% renewable energy and have reached net zero emissions.
Partnering with Oregon

We are committed to supporting the community through hiring people to build and operate our data center, volunteering and supporting local schools, nonprofits and community projects.

Supporting local schools and nonprofits
One way we support the community is through our annual Data Center Community Action Grants program and other direct funding for projects that put the power of technology to use for community benefit, connect people online or off and improve STEM education.

New renewable energy investments
Meta worked with Pacific Power to meet our 100% renewable energy goals for the Prineville Data Center. This includes supporting two new renewable energy projects in Crook County, Oregon.

Minimizing water use
We are proud to build some of the most sustainable data centers in the world and prioritize onsite water efficiency. The Prineville Data Center:

• Uses cooling technology that is significantly more efficient than the industry standard.
• Reuses water numerous times before discharging it as wastewater.
• Is landscaped with native and drought resistant vegetation and many use captured rainwater for irrigation.
• Captures and infiltrates rainwater on site.
• Utilizes water saving fixtures and technologies within data center facilities.

Water restoration
Our goal is to restore more water into local watersheds in Oregon than we consume by supporting water restoration and conservation projects led by local community partners including:

• City of Prineville Aquifer Recharge (Crooked River, OR).
• Ingram Meadow Restoration (Deschutes River, OR).
• Crooked River Water Quality Partnership Coordination and Pilot (Prineville, OR).

We're proud to support projects led by:
Bowman Museum
CASA of Central Oregon
ChickTech Oregon
COC
Confederated Tribes of Warm Springs
Crook County 4-H
Crook County Rotary
Crook County School District
Crooked River Watershed Council
Deschutes Land Trust
East Cascades Works
Economic Development Central Oregon
Family Access Network
Friends of the Children - Central Oregon
HORSES on the Ranch
Kiwanis
Latino Community Association
Mountainstar Family Relief
Oregon State University - Cascades, Innovation Co-Lab
Prideville
Prineville Downtown Association
The Father’s Group
