

Meta's Kansas City Data Center

The Kansas City Data Center will be part of Meta's global infrastructure that brings our technologies and services to life.

\$800M+

Data center investment in Missouri

2022

Broke ground on the Kansas City Data Center

~100

Operational jobs supported once completed

1,200

Skilled trade workers on site at peak construction

\$700K+

Direct funding to Clay County, Platte County, and City of Kansas City, Mo.-area schools and nonprofits

35+

Grants and sponsorships provided locally since 2022

We prioritize sustainability

Meta will be water positive in 2030, where we restore more water than we consume.

Our data centers' electricity use is matched with 100% clean and renewable energy, and our global operations have reached net zero emissions.

Meta-supported projects are adding 349 megawatts of new renewable energy in Missouri.

Meta's global fleet of data centers supports our technologies that empower more than 3 billion people around the world to share ideas, offer support and make a difference.

 Meta

Partnering with Missouri

We are committed to supporting the community through sourcing labor and materials locally where we can, volunteering, partnering with local chambers, and supporting local schools, nonprofits and community projects.

Supporting local schools and nonprofits

We launched our annual Data Center Community Action Grants program in Kansas City in fall 2024 to support projects that put the power of technology to use for community benefit, give people the power to build strong, sustainable communities, and improve STEAM education.

Prioritizing sustainability

Meta approaches sustainability from the ground up — from design and construction to operations — by prioritizing energy efficiency and renewable energy, water stewardship, and responsibly managing the end of life of our equipment. Our operational data center buildings achieve LEED® Gold certification by focusing on efficiency, sustainability and innovation. In Missouri, we are working with multiple local partners, including Evergy, to meet our 100% clean and renewable energy goal for the Kansas City Data Center. This includes supporting two new renewable energy projects in Missouri.

Minimizing water use

We are proud to build some of the most sustainable data centers in the world and prioritize on-site water efficiency. The Kansas City Data Center will:

- Use cooling technology that is significantly more water efficient than the industry standard.
- Reuse water numerous times before discharging it as wastewater.
- Be landscaped with native vegetation where possible to reduce irrigation demands.
- Capture and infiltrate rainwater on site.
- Incorporate water-saving fixtures and technologies within data center facilities.

We're proud to support community projects led by:

- Big Brothers Big Sisters of Kansas City
- Central Exchange
- Generating Income for Tomorrow (G.I.F.T. KC)
- Girl Scouts of NE Kansas & NW Missouri
- Junior Achievement of Greater Kansas City
- KC STEM Alliance
- KC Tech Council
- Newhouse Domestic Violence Shelter
- Northland Workforce Development Center
- Pawsperty
- Platte County School District
- The Regnier Family Wonderscope Children's Museum of Kansas City
- Smithville Education Foundation
- WeCode KC
- YMCA of Greater Kansas City
