

Meta Kuna Data Center

The Kuna Data Center will be part of our global infrastructure that brings Meta technologies and programs to life, making the future of human connection possible.

\$1.2B+

Data center investment in Idaho

2022

Broke ground on the Kuna Data Center

~100

Operational jobs supported once completed

1,600

Skilled trade workers on site at peak construction

\$1.5M+

Direct funding to Ada County-area schools and nonprofits

80+

Grants and sponsorships provided locally since 2022

Operating Responsibly

Responsible energy and water use

Meta worked with Idaho Power to plan for our energy needs and to ensure we are paying the full costs for the energy used by our data center, so consumers are not negatively impacted. Meta has also worked with the City of Kuna to pay the full cost of water and wastewater service for our data center. Our operational data center buildings achieve LEED® Gold certification by focusing on efficiency, sustainability and innovation.

Water stewardship

Our goal is to be water positive in 2030, where we will restore more water than we consume globally where Meta has owned operations. An initial project with Trout Unlimited will construct a fish bypass along the Alta Harris Creek Side Channel for fish to bypass the Barber Dam. Beyond just a fish passage, this project will have a large positive impact to reestablish habitat critical for the livelihood of salmonid fish and to improve water quality.

Clean and renewable energy

We are committed to supporting the addition of new energy projects to the grid — this includes three projects in Idaho that are adding 645 megawatts of new clean and renewable energy. Meta matches all of its electricity use with 100% clean and renewable energy.

Our global fleet of data centers supports Meta technologies that empower more than 3.6 billion people around the world to share ideas, offer support and make a difference.

Partnering with Idaho

Meta is committed to being a good neighbor and community partner. We do this by working with city and local partners to fund new critical infrastructure, such as roads, energy, water, wastewater and conservation projects, in addition to providing grants annually to support schools and nonprofits. Meta invested more than \$100 million to build a water and wastewater treatment system that has been given to the City of Kuna to own and operate. The system is now part of the infrastructure backbone to serve the recently annexed eastern side of the city. As a part of this facility, we also developed a water reuse system with the City of Kuna that will utilize our treated campus wastewater as irrigation water for non-edible crops, providing the city with enhanced flexibility to manage water demand.

Jobs to build and operate our data centers

We're committed to supporting local jobs in communities where we have data centers. Each data center building requires hundreds to thousands of skilled trade labor jobs to construct — steel workers, pipefitters, electricians, carpenters, fiber technicians and more. Once operational, each data center supports numerous jobs — electricians, HVAC specialists, server and network techs, and engineers — to run some of the world's most advanced data centers.

Workforce Development

We are driving America's Workforce Academy (AWA), a nationwide, cost-free, fast-track program to long-term career in a skilled trade powered by an initial \$115 million investment. Graduates earn industry-recognized National Center for Construction Education and Research (NCCER) credentials and an America's Workforce Certificate, as well as a guaranteed job.

Supporting local organizations

Meta supports the community through The Future is for Everyone Fund, providing direct funding for local nonprofits that support the community. Additionally, we bring our no-cost digital skills training workshops to Kuna, helping small businesses and nonprofits grow their reach.

Meta has been proud to invest in the Kuna community. We recently partnered with the Kuna School District on the expansion of the after-school Lego Lab program to all Kuna Elementary Schools and upgraded computer labs and wireless networks for the district's middle and high schools. Through these efforts we have helped increase digital skills and STEAM education for all Kuna K-12 students.

Water Stewardship

Our water stewardship program is focused on increasing data center water efficiency, supporting water restoration and conservation projects in watersheds where we have data centers, and being transparent with our water data.

The Kuna Data Center prioritizes on-site water efficiency by:

- Using an efficient, closed loop liquid-cooled system that uses zero operational water for the majority of the year.
- Landscaping with native vegetation where possible to reduce irrigation demands.
- Capturing and infiltrating rainwater on site.
- Incorporating water-saving fixtures and technologies within data center facilities.

We're proud to support community projects led by:

Boise State University	Kuna High School – Physical Science Department
Boys & Girls Clubs of Ada County	Lifelong Education and Aging Resource Network (LEARN)
Children's Museum of Idaho	Ross Pantry – Kuna School District
College of Western Idaho Foundation	Special Olympics Idaho
Falcon Ridge Charter School	St. Luke's Children's Hospital
Fremont Middle School	Zoo Boise
Giraffe Laugh, Inc.	
Idaho Financial Literacy Coalition
