

Meta Sarpy Data Center

The Sarpy Data Center is part of our global infrastructure that brings Meta technologies and programs to life, making the future of human connection possible.

\$2.5B+

Data center investment in Nebraska

2017

Broke ground on the Sarpy Data Center

300+

Operational jobs supported

1,300

Skilled trade workers on site at peak construction

\$5.7M+

Direct funding to Sarpy County-area schools and nonprofits

250+

Grants and sponsorships provided locally since 2019

Operating Responsibly

Responsible energy and water use

Meta worked with Omaha Public Power District to plan for our energy needs and to ensure we are paying the full costs for the energy used by our data center, so consumers are not negatively impacted. Meta has also worked with Metropolitan Utilities District (MUD) to pay the full cost of water and wastewater service for our data center. Our operational data center buildings achieve LEED® Gold certification by focusing on efficiency, sustainability and innovation.

Water stewardship

Our goal is to be water positive in 2030, where we will restore more water than we consume globally where Meta has owned operations.

Clean and renewable energy

We are committed to supporting the addition of new energy projects to the grid — this includes one project in Nebraska that is adding 320 megawatts of new clean and renewable energy. Meta matches all of its electricity use with 100% clean and renewable energy.

Our global fleet of data centers supports Meta technologies that empower more than 3.6 billion people around the world to share ideas, offer support and make a difference.

Partnering with Nebraska

Meta is committed to being a good neighbor and community partner. We do this by working with city and local partners to fund new critical infrastructure, such as roads, energy, water, wastewater and conservation projects, in addition to providing grants annually to support schools and nonprofits.

Jobs to build and operate our data centers

We're committed to supporting local jobs in communities where we have data centers. Each data center building requires hundreds to thousands of skilled trade labor jobs to construct — steel workers, pipefitters, electricians, carpenters, fiber technicians and more. Once operational, each data center supports hundreds of jobs — electricians, HVAC specialists, server and network techs, and engineers — to run some of the world's most advanced data centers.

Workforce Development

Meta is investing in the workforce that's building America's digital infrastructure — starting with the communities where we live and work. That commitment includes America's Workforce Academy (AWA), a nationwide, unprecedented fast-track to a long-term career in a skilled trade. Powered by an initial \$115 million first-year investment, AWA is a cost-free program that supports all participants while they learn and then guarantees a job for all graduates. Graduates earn both the industry-recognized National Center for Construction Education and Research (NCCER) credential and an America's Workforce Certificate, both designed to travel with the worker across employers and industry sectors.

Water Stewardship

Our water stewardship program is focused on increasing data center water efficiency, supporting water restoration and conservation projects in watersheds where we have data centers, and being transparent with our water data. In Nebraska, we have supported two water restoration projects so far. Initial projects included wetland restoration and irrigation-efficiency projects for local farmers that will restore millions of gallons of water each year.

The Sarpy Data Center prioritizes on-site water efficiency by:

- Using cooling technology that is significantly more water efficient than the industry standard.
- Reusing water numerous times before discharging it as wastewater.
- Landscaping with native vegetation where possible to reduce irrigation demands.
- Capturing and infiltrating rainwater on site.
- Incorporating water-saving fixtures and technologies within data center facilities.

Supporting local organizations

Meta supports the community through The Future is for Everyone Fund, providing direct funding for local nonprofits that support the community. Additionally, we bring our no-cost digital skills training workshops to Nebraska, helping small businesses and nonprofits grow their reach.

We're proud to support community projects led by:

Access Period	Omaha STEM Ecosystem
Arbor Day Foundation	Outlook Enrichment
Bellevue Public Schools	Papillion Area Historical Society
Bellevue University	Papillion Community Foundation
Fontenelle Forest	Papillion La Vista Community Schools
Gifford Farm Education Center	Papillion-La Vista Community Theatre
Girl Scouts Spirit of Nebraska	Papillion Public Library
Gretna Public Schools	Prairie STEM
Gretna Public Schools Foundation	Sarpy Community YMCA
Grow Sarpy	Sarpy County Food Pantries (via Papillion Community Foundation)
Kiewit Luminarium	Sarpy County Historical Society
La Vista Community Foundation	Springfield Community Foundation
Lift Up Sarpy County	Springfield Memorial Library
Logan Fontenelle Middle School	Springfield Platteview Community Schools
Midlands Community Foundation	Twin Ridge Elementary
Midlands Community Foundation Coronavirus Response Fund	United Way of the Midlands
Nebraska Vietnam Veterans Memorial	YMCA of Greater Omaha
