

Meta Kansas City Data Center

The Kansas City Data Center is part of our global infrastructure that brings Meta technologies and programs to life, making the future of human connection possible.

\$1.2B

Data center investment in Missouri

2022

Broke ground on the Kansas City Data Center

100+

Operational jobs supported

1,500

Skilled trade workers on site at peak construction

\$1.9M+

Direct funding to Clay County, Platte County, and City of Kansas City, Mo.-area schools and nonprofits

100+

Grants and sponsorships provided locally since 2022

Operating Responsibly

Responsible energy and water use

Meta worked with Evergy to plan for our energy needs and to ensure we are paying the full costs for the energy used by our data center, so consumers are not negatively impacted. Meta has also worked with KC Water to pay the full cost of water and wastewater service for our data center. Our operational data center buildings achieve LEED® Gold certification by focusing on efficiency, sustainability and innovation.

Water stewardship

Our goal is to be water positive in 2030, where we will restore more water than we consume globally where Meta has owned operations.

Clean and renewable energy

We are committed to supporting the addition of new energy projects to the grid — this includes three projects in Missouri that are adding 599 megawatts of new clean and renewable energy. Meta matches all of its electricity use with 100% clean and renewable energy.

Our global fleet of data centers supports Meta technologies that empower more than 3.6 billion people around the world to share ideas, offer support and make a difference.

Partnering with Missouri

Meta is committed to being a good neighbor and community partner. We do this by working with city and local partners to fund new critical infrastructure, such as roads, energy, water, wastewater and conservation projects, in addition to providing grants annually to support schools and nonprofits.

Water Stewardship

Our water stewardship program is focused on increasing data center water efficiency, supporting water restoration and conservation projects in watersheds where we have data centers, and being transparent with our water data.

The Kansas City Data Center prioritizes on-site water efficiency by:

- Using cooling technology that is significantly more water efficient than the industry standard.
- Reusing water numerous times before discharging it as wastewater.
- Landscaping with native vegetation where possible to reduce irrigation demands.
- Capturing and infiltrating rainwater on site.
- Incorporating water-saving fixtures and technologies within data center facilities.

Jobs to build and operate our data centers

We're committed to supporting local jobs in communities where we have data centers. Each data center building requires hundreds to thousands of skilled trade labor jobs to construct — steel workers, pipefitters, electricians, carpenters, fiber technicians and more. Once operational, each data center supports hundreds of jobs — electricians, HVAC specialists, server and network techs, and engineers — to run some of the world's most advanced data centers.

Workforce Development

Meta is investing in the workforce that's building America's digital infrastructure — starting with the communities where we live and work. That commitment includes America's Workforce Academy (AWA), a nationwide, unprecedented fast-track to a long-term career in a skilled trade. Powered by an initial \$115 million first-year investment, AWA is a cost-free program that supports all participants while they learn and then guarantees a job for all graduates. Graduates earn both the industry-recognized National Center for Construction Education and Research (NCCER) credential and an America's Workforce Certificate, both designed to travel with the worker across employers and industry sectors.

Supporting local organizations

Meta supports the community through The Future is for Everyone Fund, providing direct funding for local nonprofits that support the community. Additionally, we bring our no-cost digital skills training workshops to Kansas City, helping small businesses and nonprofits grow their reach.

Meta has been proud to invest in the Kansas City community. Through a dynamic partnership with Junior Achievement of Greater Kansas City, Meta launched a Meta Storefront in BizTown — a hands-on educational program that empowers students in grades four through six from across the Kansas City region with essential skills for economic success. In 2025, Meta directly supported the participation of more than 1,500 students from Clay County, Platte County and the City of Kansas City, Mo., providing them with real-world experiences that inspire future leaders and entrepreneurs.

We're proud to support community projects led by:

Big Brothers Big Sisters Kansas City	Make48
Boys & Girls Clubs of Greater Kansas City	Metropolitan Community College
Camp Encourage	Northland Workforce Development Center
Central Exchange	Operation Breakthrough
The Farmer's House Inc.	Pawsperity
Girl Scouts of NE Kansas & NW Missouri	Platte County School District
Horizon Elementary	Platte 3 III School District Robotics
Junior Achievement of Greater Kansas City	The Regnier Family Wonderscope Children's Museum of Kansas City
KC STEM Alliance	Smithville Education Foundation
KC Tech Council	Veterans Community Project
Kansas City Public Schools Education Foundation	WeCode KC
LevelUp Kids, Inc.	
Liberty North High School
